

Water for the Next 50+ Years

NBU has been planning to ensure reliable water beyond 2075—even during drought.

TODAY → 2030 → 2050 → **2075+**

A STRONG, DIVERSE SUPPLY

Multiple sources keep our system reliable:

RIVERS & RESERVOIRS

EDWARDS & TRINITY AQUIFERS

REGIONAL PARTNERSHIPS

TOTAL AUTHORIZED SUPPLY: 54,575 ACRE-FEET / YEAR

1 acre-foot = A football field covered with 1 foot of water

Planned for Drought & Growth

New Braunfels is growing—and we're ready.

Key takeaway: Supply is planned to meet demand for decades

SMART WATER USE MAKES OUR FUTURE EVEN STRONGER

Every NBU customer can help protect our water supply and save money each month through water conservation efforts.

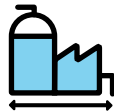

- Only use what you need
- Water lawns before 10 am and after 8 pm
- Fix leaks
- Know the current water stage

Find more water-saving tips at NBUStrongFuture.com

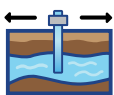

INVESTING IN RELIABILITY

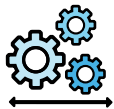

Ongoing projects strengthen our system:

EXPANDED TREATMENT CAPACITY

AQUIFER STORAGE & RECOVERY

INFRASTRUCTURE IMPROVEMENTS

NBU'S ROLE

NBU is committed to providing:

- Strong planning and water stewardship for our community
- Information to our customers to save water and save money

Ready for the Future

Designed for reliability—even in drought.

A system you can count on.
