

Drought Contingency Plan Overview

AT A GLANCE

Below is quick view of who the proposed plan affects, as well as when and why.

Who it affects

Surcharge is only geared towards **high-use irrigators**, signaling conservation.

Who is not affected

73% of customers (non-irrigation) will **not be affected** by surcharges.

When it's happening

Council readings in August/September and will be effective **Fall 2026**

Why it's happening

Syncing trigger levels with the Edwards Aquifer Authority to **improve clarity**.

WHAT'S CHANGING?

Expanded operational flexibility to respond to broader drought conditions.

The plan adds **Stage 4** and **Stage 5** to create defined strategies for worst-case scenarios.

Updated surcharge amounts during severe drought Stages (3-4): From \$1.00/\$2.00 per thousand gallons to \$4.18/\$4.89 per thousand gallons.

OUR DIVERSIFIED WATER PORTFOLIO SUPPORTS NEW BRAUNFELS WATER NEEDS FOR 50+ YEARS

WHAT'S NOT CHANGING?

No drought surcharge to essential use water customers of less than 6,000 gallons a month.

There are no drought surcharges during Stage 0 through Stage 2.

Surcharges are only triggered in Stage 3 and above and end once conditions have improved.

TIMELINE

Strong communities start with smart water use

Small, water-saving actions keep our water future strong.

- Water early in the morning or later in the evening
- Fix leaks promptly
- Avoid watering sidewalks, driveways, and streets
- Choose drought-tolerant landscaping when possible
- Stay informed about current drought stages

Save water. Save money. Keep our water future strong.
