NEW BRAUNFELS UTILITIES

JOB DESCRIPTION

Job Title: Substation Electrician Apprentice II

Job Status: Full-Time

Department: Electric Substation

Job Grade: 902

Reports To: Substation Supervisor

Work Setting: On-Site

Pay Status: Non-Exempt

Date Created/Updated: 11/8/2024

Location: Service Center

Position Summary

The Substation Electrician Apprentice II, under general supervision, will perform tasks in construction, operations, and maintenance of electric substation and transmission facilities to include distribution breakers and apparatus, transmission breakers and apparatus, power transformers, control systems, structures, substation properties, and transmission rights of way. Responds during and after normal business hours to all trouble calls relating to Substations in all weather conditions. Demonstrates safe driving habits and maintains a clean driving record. Expected to demonstrate independent critical thinking, sound judgment, and responsible decision making in order to execute both routine and abnormal work activities safely and efficiently. The Substation Electrician Apprentice II develops skills and knowledge contributing to the overall team's capability. The Substation Electrician Apprentice II is expected to complete the training and demonstrate competency in the skills established within Level II of NBU's Substation Apprenticeship Program after 12 months, but within no more than 18 months. Minimum qualifications are non-negotiable.

Essential Duties & Responsibilities

SUBSTATION AND TRANSMISSION OPERATIONS

- Responsible for maintaining clean and organized work areas, such as:
  - Service Trucks
  - Control Houses
  - Storerooms and workstations
- Assist Substation Supervisor with project administration tasks
- Assist in planning, coordinating, and executing 12.5 kV and 138 kV switching operations
- Investigate on behalf of consultants and assist them on-site with information gathering activities
- Support NBU staff with tasks related to or collocated with substations and transmission rights of way
- Review proposed plan sets and technical specifications for operational validity and correctness
- Learn the layout of NBU's electrical systems, including substations, transmission lines, and distribution feeders.
- Perform testing, calibration, and troubleshooting of substations' electrical systems using electric test equipment (i.e., Transformer Turns Ratio (TTR) tester, Breaker tester, Multi-Range Voltage Detector (MRVD), Phasing sticks, rotation meters, digital multi-meters (DMM), and clamp-on amp meters).
- Operate high-voltage transmission, substation, and distribution switching devices and equipment, using proper Personal Protective Equipment (PPE) and Personal Protective Devices (PPD), to energize, de-energize, and isolate circuits.
- Assist with purchasing, storing, receiving, retrieving, and distributing equipment, tools, and supplies.
- Schedule, plan, and successfully complete the training courses and competency demonstrations detailed in Level II of the NBU Substation Apprenticeship program

SUBSTATION AND TRANSMISSION MAINTENANCE

- Perform periodic site and equipment inspections, report findings, and resolve routine maintenance items to ensure proper operation, such as:
    - Change compressed gas cylinders
    - Equipment maintenance as prescribed by the manufacturer
    - Replace, adjust, and modify equipment and components
    - Conduct infrared camera inspections and address areas of concern
    - Power and control wiring repairs
    - AC and DC power systems and equipment
- Perform periodic and reactive inspections of transmission lines and rights of way, and report findings

SUBSTATION AND TRANSMISSION CONSTRUCTION

- Build, modify, and enhance substation and transmission facilities
- Ensure safety and quality of construction and capital improvement activities performed on and around NBU facilities by others, such as:
    - Contractors and consultants
    - NBU staff
    - LCRA and other utility Personnel
- Construction Project Management duties, such as the following, as delegated by the Substation Supervisor:
    - Review and develop construction project contracts, design drawings, and specifications
    - Supervise contractors and consultants and inspect their work products
    - Resolve requests for information and change orders
    - Resolve material procurements
    - Review project after completion and report successes, lessons learned, and opportunities for improvement

GENERAL RESPONSIBILITIES

- Ability to learn new skills, perform those skills consistently, and recall those skills for application after time passes.
- Must develop an understanding of operations concepts in order to repeat similar tasks in differing circumstances and environments.
- Ability to work
    - on and near equipment energized at hazardous voltage levels
    - in confined spaces and at hazardous heights
- Ability to read, write, and understand verbal and written communications in English
- Ability to understand design plan sets and technical specifications
- Ability to lift and carry tools, equipment, and materials in hazardous environments and across uneven ground
- Ability to distinguish colors accurately
- Maintain regular attendance; leave schedule should be managed so as not to interfere with the ability to accomplish tasks, including special projects and assignments with deadlines
- Adhere to NBU safety and administrative policies, procedures, and practices always and in all situations
- Ensure NBU staff, contracted staff, and visitors adhere to NBU safety and security standards
- Develop & maintain effective customer service skills for communications with co-workers, customers, and the public in general
- Maintain strict confidentiality of business, employee, and customer information in written and oral communications and safeguard sensitive documents
- Exemplifies NBU Core Values

- Participate in and support initiatives to reach annual NBU Performance Measures
- Other duties as assigned

Formal Education and Work Experience Requirements

Degree/Diploma Obtained: High School Diploma/GED

Field of Study: General Studies

Work Experience Time Frame: One Year or More

Other: Click or tap here to enter text.

Certification and Licensures Requirements

- Class 'C' Driver's License must be maintained as a condition of employment

Other Minimum Qualifications

- Verified as meeting the minimum qualifications of the NBU Substation Electrician Apprentice I
- Successful completion of Level I of NBU's Substation Apprenticeship program.
- Verified previous Apprenticeship Program experience (NBU or other programs) and appropriate levels of field experience may qualify an individual to be placed within NBU's Substation Apprenticeship Program – the individual may be required to demonstrate knowledge and competency through field and/or classroom testing for appropriate placement.
- Successful completion of OSHA 1
- Demonstrated ability to operate autonomously on call duty while maintaining the highest standards of safety and integrity.
- Demonstrate mastery of electrical fundamentals, including:
    - Safe electrical worker practices
    - Direct Current (DC) systems
    - 3-phase power transmission, transformation, and distribution
- Basic concepts and functions of major substation equipment such as switches, conductors, breakers, and transformers
- Ability to work safely and efficiently in elevated positions
- Must reside within a forty-five-minute response time of the NBU Service Center as measured by an internet mapping tool.
- Strong mechanical aptitude & safe work habits
- Positive technical and behavioral performance history
- Flexibility in work schedule, including emergency response, holiday, weekends, and after-hours as required. On-call duty (24 hours per day, 7 days per week, typically for two weeks at a time) is required on a periodic basis.
- Ability to use basic computer software programs such as Microsoft Excel, Microsoft Word, and Outlook.
